

Bus Maintenance

Buses used in the District's transportation program shall be maintained in a safe and legal operating condition.

All scheduled inspections shall be performed, using a prescribed checklist, by a competent mechanic who shall provide written certification as to the condition of the vehicle. A maintenance log shall be maintained for each vehicle which shows inspection dates and results. The log also shall show a record of all major maintenance performed on the vehicle.

The bus driver shall perform a pre-trip inspection of all warning and emergency devices and equipment prior to every trip where students are being transported. A District-approved checklist shall be used and initialed by the driver for each pre-trip inspection.
